

6.2 Fibres and Textiles

6.4 The impact of forces and stresses on textiles and the process of reinforcing or stiffening

Describe what a compressive force is

Using two arrows show what a compressive force looks like

Describe what a tension force is

Using two arrows show what a tension force is

Describe what a Shear force is

Using two arrows show what a shear force is

How can you overcome forces within a textiles product?

Name an example textiles product that requires reinforcement

.

Name examples of different reinforcement and stiffening techniques
